please fix this PLEASE. Great time killer.. I mean, it costs nearly nothing at all and just gives you a few parts to get soem boosters for the equipment you have, and can do some Missions. Sell some steam trading cards if you must, it's not really a VbadV deal in my opinion.. Rating: 5/10

Darkness Assault is a topdown styled survival horror game. It is budget titles and this is apparent through the entire game. If you enjoy the genre in general and don't mind low budget titles, it is worth the extremely low price.

Going into this game you can expect the basic survival horror elements. You will hunt for keys, weapons, ammo and health all while killing (and/or avoiding) enemies. The enemies move relatively slow and are easy to dispatch when properly equipped. The biggest challenge in this game is navigating through each level as they are basically large mazes. I actually felt a small sense of accomplishment, equivalent to solving a puzzle, each time I found the end of the levels. The game does have a nice atmosphere and some decent sound effects for such a low budget title.

There are also documents you can find while exploring to fill you in on the story, which aside from these findings and a small non-cinematic thing at the beginning of each level, is basically non-existent. The story has potential, it is just not explored in enough detail; it is hardly explored at all. You can finish the entire story in about 2 hours and there isn't much in the way of replay value.

I give this game a 5/10 mostly for the very low price. I can only recommend it to fans of the survival horror genre. The game is set up for a sequel and if priced similarly I will likely purchase it.. I keep starting up this game wanting it to be good but after about 15 minutes or so I've had enough, every time. Your forced to sit through endless dialog. Looking at an image of the story while listening to the characters go on and on, then finally your able to do a fight. You can probably win using one or two buttons, then more looking at an image while you listen to more voiceover story (No real time or otherwise cinema). Rinse and repeat.

It is absolutely awful. This trend of trying to pump out fighters as quick as possible to make more money faster is ruining the genre. Do not buy this.. After playing 45 minutes it became evidently clear i was going to refund it.

I love this idea and i hope the bugs get fixed, until then im going to stay away from this and as far as anyone else, I suggest to hold off until certain bug elements get fixed.

I tried making multiple games where i renamed the entire roster of champions to the actualy league of legends champions and it bugged out and didnt do anything every time. I then tried to make games where i didn't refund it and just run the game as is.

Same thing.. Hard and fun

Its another rage game, Music is good, and gameplay is amazing.. I just played Turba for 15 minutes, to get the Summer achievement that was added to it.

Afterward when I got up from my chair, I stubbed my toe very hard, fell and bashed my arm on a bookcase as I tried to catch my fall, scraped my leg rather painfully, and finally broke my fall by smashing my hand against the sharp corner of a wooden box. My arm hurts, my leg hurts, my hand hurts, and my toe is bleeding a bit. I also seem to have punched myself in the stomach or something on the way down, I'm not even sure on that, but it hurts there too.

Still, if I had no choice but to repeat one of those two experiences, I would not choose Turba.. Actually very nice game. Story / art style / turn-based combat / skill + stat + item management, everything is good. Kinda simple, but beautiful. Luv it.. **While 1993 Space Machine certainly has a lot charm and its core idea is in the right place, I don't think its worth the asking price.**

Directly after booting it up, I was like "*oh man this is gonna be great - ship upgrades and bullet hell and retro graphics!*". And it

was pretty fun, but things are paper thin, and flaws quickly begin to show. There aren't *really* that many upgrades, and most of the ships sound the same (I played three and they didn't seem any different in speed or really anything). I don't hate this game as much as I just think twelve bucks is about twice as high as it's probably worth).

Pros:

- +I really enjoyed the ship upgrade/bullet hell/retro graphics idea with controller support. It is fun.
- +Four player local support, although I didn't have the opportunity (yet) to try multiplayer.

Cons:

- While upgrade options seem large in the beginning, they are actually quite limited (which seems like a fairly easy fix for the developers seeing that the base game is already done).
- Asking price is too high.
- Ships don't seem like they have substantially different abilities/movement speeds/etc.

What seemed *really* fun in the beginning turned out to be more 'meh' than anything.

Not as good as the others, but still an amazing game that fans of the first will love.. Great game to play in co-op. The last boss was so HARD though..... Must have character. BlackInk is amazing!

I like to use different kinds of design and paint software. BlackInk is one of my favourites to play around with.

Some features are simply fantastic and make my art flow.

Keep up the great work guys. I love your software!. Absolute and exceedingly lazy Unity Asset GARBAGE. And to think that this game was actually in "early access" development for more than two years right here on Steam...

[This developer should be ashamed of himself and this abomination and huge pile of Unity asset fecal matter he calls "365 Days"...](#)

[My score using my indie game reviewing system: a NEGATIVE 10 on a scale of 0 to 100. Nothing of value what-so-ever and a negative point for every American dollar this shameless developer is asking for it.](#)

[NOT RECOMMENDED. Go pay a random farmer \\$10 for some fresh pig crap and rub it all over your body BEFORE you buy this trash as that would be a much better way to spend your money.. At least that farmer might be able to buy a loaf of bread, some butter, and a gallon of milk. Farmer Jed would also be much more deserving of your money than this scam artist developer.. I do not understand two things:](#)

[What is the objective of the game](#)

[And why did I buy this game?. Phattest beatsies on steam. Fantastic soundtrack to an even better game!. A little ankle goes a long way.. Even for free, it's not really worth it. It is pretty tedious to play. Instead of ONE city, you really have to make multiple cities beside each other. The reason is simple, limited range of all buildings. Want to build a mine a bit of a distance away? have to build a warehouse first, have to build houses too, then have to make temple, have to make taylor, food, etc etc, it snowballs everytime. Make too many houses in one area, automatically have unemployed that can never get jobs. The tropico series is a much better city building game.](#)
